Here is a very special female out of our very durable "Gigi" commercial cowline that brings back the Simm x RA cross that we have prospered with in our commercial herd for nearly 30-years. She had a very successful show career for our son but has settled down to being one of our most productive commercial females. It is hard to deny this cows depth, thickness and milking ability. Her calves ALWAYS stand out as some of the most muscular and eye appealing calves given the great maternal care she gives as a mother.
